

## Funding of Network Activities

EERA Council has agreed to financially sponsor activities initiated by Networks. Two funding schemes are currently available:

Network Projects and Network Summer Schools.

### **Network Projects**

Network Projects are smaller activities, where no major co-funding is expected. Application can be submitted throughout the year, preferably at least one month prior to Council meetings taking place in January, June and September. EERA Officers will examine applications ensuring that all requests are within budget.

### **Network Summer Schools**

Network Summer Schools are courses specifically designed for capacity building and targeting at PhD Students and Emerging Researchers (Post ? Doc). Normally an application should cover courses for two successive years. Besides EERA, the applying network needs to have a second partner who is willing to financially support the Summer School. Applications can only be put forward after a formal Call by EERA Council. The next Call will be issued in 2012. Networks can then apply for courses in 2013/2014.
