

Annual Report 2011, Berlin

ECER 2011 was a turn in the life of the NW. A new co-convenor (Magali Hardouin), a new focus on professional development and new projects for 2012 and 2013. Only 20 papers were presented ; it was not like in Vienna in 2010 with 34 (the record of the network) but we know that we lost some papers due to a new network with the same focus.

All the papers were well presented with a lot of questions each time. The network meeting with 18 colleagues was a great session to prepare for the next ECER.
