

ECER 2012

We would like to organise a theoretical symposium about partnership for Cadiz 2012. The central question will be: from one country to another, is the notion of partnership mobilized in the same way? We are planning a two-dimensional structure for this symposium with a synchronic and diachronic dimension. We also plan to have our first workshop.

ECER 2011

A link with the Emerging Researchers' Group should be re planned for ECER 11 (first contacts are established).

A link with two other NWd is also possible regarding to the sub topic 'public at risk, teacher training' and perhaps with the new Network 'Research on Health Education' . This last new NW is very closed from one of our topics 'Education at Health'
